

Podanfol 2024: Investing in the Future!

The year 2024 marks a turning point in the history of Podanfol S.A. As one of the **world leaders in the production of artificial casings**, we continually strive to improve our processes and products. This year, we proudly announce a significant investment that will allow to increase our production capacity by 50%. These changes are not only a testament to our ambition but also to our commitment to delivering the highest quality products. We are confident that these investments will contribute to the further growth of our company and the satisfaction of our clients.

Our latest investment involves the construction of new production lines, enabling us to manufacture the full range of our product portfolio. We are excited to offer an even **wider array of high-quality casings**, meeting the growing needs and expectations of our customers worldwide.

Podanfol is more than just a manufacturing company - it's a place where modernity meets tradition. Continuous development, implementing more interesting, unconventional solutions, fine-tuning of casing parameters to particular applications, and customized technical solutions - these characteristics distinguish us in the market. This investment is **another step forward** in our mission to offer top-quality products, tailored to the individual needs of our clients.

From our CTO and vice-president
Olaf Wozniak

As the Technical Director of Podanfol S.A., I am responsible for overseeing our latest investment. I am proud to say that the new production lines have been designed and optimized by our specialists specifically for our company's needs. With our experience in managing technical projects and many years of experience in casing production, we can be certain that these innovations will be perfectly suited to Podanfol's long-term strive in meeting our customers' requirements. I also wish to express my sincere gratitude to our partners for their ongoing trust and support, which allow us to shape the future of the casing industry together.
